Student Progression Framework (SPF) - Guidelines

Date: 11th June 2024

Objective of Student Progression Framework (SPF)

To enable every student to

1. Graduate in 4 years
2. Have a career option ready by the time of graduation

Why are SPF bands required?

1. Every student should **maintain a good balance between academics, co-curricular and extra curricular activities** for holistic development, as part of their learning process. HITAM has numerous initiatives to provide a high quality learning experience for students, and SPF ensures the balance is maintained.
2. Students are classified into four bands - A, B, C and D - based on which they can be offered personalized attention, guidance and permissions to ensure the identified objectives are met.
3. **No additional permissions are required for participating in extracurricular or co-curricular activities, if a student is participating without missing their academic hours.**
4. If any student needs to skip the academic hours either for preparation or participation in co-curricular and extra curricular activities, the following guidelines apply,

    a. Students in **A and B bands** can participate by submitting a request letter signed by the concerned activity in-charge (FPR), to the Head of Operations (Program Office), at least 2 days before the event. The Head of Operations will notify the same to the HOD, marking a copy to the Principal and the Registrar for necessary processing of attendance. Request letter format can be downloaded from the following link https://bit.ly/3Rk9xT8

    b. Students in **C and D bands** are encouraged to focus more on academics to ensure they graduate within 4 years, and put in the required effort to migrate to band A or B in the next cycle. **If it becomes necessary for C and D band students to participate**, the concerned activity incharge (FPR) or any faculty member who is willing to handhold the student can issue a letter of endorsement for the student, vouching to help them balance their academics.

        i. The format for 'Letter of Endorsement (for band C and D)' can be downloaded from the following link, https://bit.ly/3ReDF25
        ii. The letter of endorsement is to be submitted to the Head of Operations (Program Office) well in advance, to coordinate the required review and update the final decision to the student within a maximum time frame of 2 working days.

5. The permissible attendance for any such exemptions would range between 10 to 20% per semester, and cannot exceed 20% under any circumstances.

Whom to contact in case of any concerns or clarifications regarding SPF

Meezab Unnisa
Head of Operations, Program Office
Room F18
Email: head.operations@hitam.org / Phone: 76809 01066

How are SPF Bands Created?

Factors taken into consideration for Band classification:

1. **Attendance** - considered for the period from the previous band classification to the current classification
2. **Score in continuous internal examinations, including the mid examination** - considered from the time of previous band classification
3. **Active backlogs** as on the date of band classification (Note: If the supplementary result for a subject is awaited as on date of the band classification, it will be considered as an active backlog for that cycle)

How frequently are the SPF Bands reclassified:

- SPF band classification is done **twice a semester**, following every mid examination (after the mid exam results are released)

  Example: If a student is in 2-1, the band classification generated after the second mid of 1-2 will be applicable until the first mid examination of 2-1; the band classification generated after the first mid of 2-1 will be applicable until the second mid of 2-1

Who Generates the Band:

- The bands are generated at the Program Office taking the data from ERP, and the process is automated.

What is the 'Band Metric' and how is it derived?

- Band Metric is the total score achieved by a student based on their attendance, backlogs and continuous internal examination score, and is used for band classification.
- Refer next page to understand how the Band Metric is derived

Band Classification based on Band Metric

Band Classification	
Band Metric (Range)	**Band**
75 to 100	A
60 to 75	B
45 to 60	C
Less than 45	D

Medchal-Malkajgiri (Dist.) T.S.

How does Attendance contribute towards the Band Metric:

Maximum contribution of attendance towards the metric: 30

Attendance Percentage	Contribution Towards Band Metric
Less than 75	0
75 to 80	5
80 to 85	10
85 to 90	15
90 to 95	20
95 to 100	30

How does CIE contribute towards the Band Metric:

Maximum contribution of CIE towards the metric: 30

Average of Score in Continuous Internal Examinations and Mid Examination (Scaled to 100)	Contribution Towards Band Score
Less than 40%	0
40 to 50	5
50 to 60	10
60 to 75	20
75 to 100	30

How do backlogs contribute towards the Band Metric:

Maximum contribution of backlogs towards the metric: 30

Number of Active Backlogs (Theory and Lab Included)	Contribution Towards Band Score
More than 5	0
4	5
3	10
2	20
1	30
0	40

Note: For Semester 1, attendance and CIE are scaled to 50 each, as the backlogs would not be relevant.
